TREE HYRAX
Trädhyrax

ROCK HYRAX

Klipphyrax (klippdass)

HYRAXES CLOSEST LIVING RELATIVES ARE ELEPHANTS

- HYRAXES HAVE MOLARS AND ENLARGED INCISORS (SIMILAR TO ELEPHANTS TUSKS)
- THEY HAVE SPECIALIZED FOOT PADS THAT PROVIDE A STRONG GRIP – SIMILAR TO THE SOLES OF AN ELEPHANT FOOT
- FEMALE HYRAXES ARE PREGNANT FOR 7-8 MONTHS, WHICH IS VERY UNUSUAL FOR SUCH A SMALL ANIMAL BUT IS MORE LIKE THAT OF ELEPHANTS

SO EVEN THOUGH THEY LOOK COMPLETELY DIFFERENT, THERE ARE CLEAR EVOLUTIONARY CONNECTIONS!
